Yes/No – result is/not in agreement with the certified value

n.d. – not detected

<sup>1</sup> The uncertainty was estimated by the “top-down” approach combining standard uncertainties calculated for both precision and trueness. The estimation of the relative standard deviation for reproducibility conditions was based on the empiric equation between repeatability ( $RSD$ ) and reproducibility ( $RSD_R$ ) ( $RSD = 0.66 * RSD_R$ ).

<sup>2</sup> Certified value is a sum of BDE 28 and 33
